Frequently Asked Questions

What is BioRender?

BioRender is an online software tool that helps scientists create and share beautiful, professional science figures in minutes.

I already have a BioRender account. How do I link it to the Institution license?

The BSD/PME Premium license is SSO enabled. To join the license, users will need to use their unique @uchicago.edu credentials.

If you have a BioRender account under an email other than your @uchicago.edu email address, you can [update your email address](#) on the account or create a new account and [share](#) important figures with your new account.

Users can request access to the BSD/PME Premium license by clicking the "[Click Here to Request Access!](#)" button above, which will automatically compose a request email to be sent off to the BSD Helpdesk. BSD's HelpDesk will notify you when access has been granted or denied.

How can I get reimbursed for any time remaining on my personal subscription if joining the wider BSD/PME license?

If you were paying for your account previously, please contact support@biorender.com after you've joined the Institution license. The BioRender Customer Experience Team will assist in providing any refunds for time remaining on your personal subscription.

For questions, please contact the Biological Science Division HelpDesk at:
bsdis@bsd.uchicago.edu
